

**REPORT/RECOMMENDATION TO THE BOARD OF SUPERVISORS  
OF SAN BERNARDINO COUNTY, CALIFORNIA  
AND RECORD OF ACTION**

**April 6, 1999**

**FROM:** KEN A. MILLER, Flood Control Engineer  
Transportation/**Flood Control**

**SUBJECT: COMMON USE AGREEMENT WITH THE COUNTY OF SAN BERNARDINO  
ZONE 1 - SAN SEVAINE CHANNEL**

**RECOMMENDATION:** Acting as the governing body of the Flood Control District and as the governing body of the County, approve Common Use Agreement between the District and the County allowing the County to use District owned land to operate and maintain a box culvert crossing of San Sevaime Channel at Napa Street.

**BACKGROUND INFORMATION:** In conjunction with the development of the California Speedway and adjacent lands, the developer constructed various road improvements including the Napa Street bridge crossing of San Sevaime Channel. The bridge crossing construction was performed pursuant to a permit issued by the District. Upon completion by the developer, the Napa Street road improvements were accepted into the County's Maintained Road System. It is now desirable for the District and the County to enter into an agreement for the operation and maintenance of the roadway crossing of San Sevaime Channel, as well as setting out the liabilities of each entity within the area of common use.

**REVIEW BY OTHERS:** This item was reviewed by Chief Deputy County Counsel Michael A. Sachs for Risk Management on August 10, 1998 and by Deputy County Counsel Rex A. Hinesley on March 25, 1999.

**FINANCIAL IMPACT:** This transaction will have no financial impact on the District.

**SUPERVISORIAL DISTRICT(S):** 2nd

**PRESENTER:** Ken A. Miller
